\*Percentages of ill-defined causes of death, most recent year, male/female

\*\* The methods to estimate the national sex and age-specific incidence rates in 2020 are:

1 - Estimates based on national and local incidence data

2A - Estimates based on local incidence and national mortality data

2B - Estimates based on national mortality, and other countries incidence data

<sup>1</sup> Incidence and mortality data cover the government-controlled area of Cyprus.
